19. ABSTRACT (Continue on reverse if necessary and identify by block number) This report presents a detailed summary of CHAMPUS costs and utilization for mental health treatment in Army Health Services Command for three periods: FY 1991, FY 1992 and 1st Qtr FY 1993. The report was prepared at the request of the Coordinated Care Division, U.S. Army Health Services Command (HSC). Summaries are provided based on claim type (institutional, inpatient and outpatient professional), facility type (mental retardation facility, psychiatric facility, residential treatment center, other), provider type (Psych I (psychiatry), Psych II (other)), and HSC catchment areas (incl. outside catchment area category). Tables show number of patients, number of visits (outpatient prof.), number of services (inpatient and outpatient prof.), total dollar amounts allowed, billed, paid by government, paid by patients, and paid by other sources. An overall summary table includes average amounts paid by the government per patient, admission, visit, and service.

EXECUTIVE SUMMARY

This report presents a summary of CHAMPUS mental health treatment costs and utilization in U.S. Army Health Services Command¹ for Fiscal Year (FY) 1991, FY 1992 and 1st Qtr FY 1993. The report was prepared at the request of the Coordinated Care Division, U.S. Army Health Services Command (HSC).

The institutional, inpatient professional and outpatient professional service records analyzed in this study were extracted from the Tri-Service CHAMPUS Statistical Database Project (TCSDP) Main Relational Database. Army claim records with voucher processing dates of Oct 1990 through Dec 1992 were examined. Records were extracted if they met one of the following criteria concerning ICD-9-CM diagnosis codes:

- 1) the first 3 digits were '290'-'319', 'V11', 'V40', 'V61', 'V62', or 'V79';
- or
- 2) the first 4 digits were '7805', '7999', 'V154', 'V170', 'V673' or 'V710'.

However, if the first 4 digits were '7999', records were limited to those where the facility or provider specialized in mental health care. In other words, for institutional services claims, the facility type was 'psychiatric', 'mental retardation', or 'residential treatment center'; and for professional services claims, the provider major specialty was 'psychiatry', 'psychiatry (D.O.)', 'psychologist', 'psych nurse specialist', 'mental health counselor', 'marriage/family counselor', 'pastoral counselor', 'M.S.W., A.S.W.', 'social worker', or 'marriage/family therapy'.

Data were summarized according to

- 1) FY (voucher processing date),
- 2) type of claim (institutional, inpatient professional, outpatient professional),
- 3) catchment area (one of the billable treatment facilities or the category "total outside catchment area"),
- and
- 4) type of institutional facility (mental retardation, psychiatric, residential treatment center, other (all other facilities including general hospitals)),
- or
- type of professional provider
 - a) Psych I (psychiatry, psychiatry (D.O.))
 - b) Psych II (all other provider specialties including non-mental health specialists).

¹Treatment of children and adolescents in Fort Bragg Child/Adolescent Mental Health Demonstration Project is not included.

Two types of tables summarizing the cost and utilization data are presented in Appendices A through F. The first set of tables (Appendices A-C), shows catchment area totals listed for each type of facility/provider within each type of claim. These tables include overall totals for each facility/provider type and each claim type. The second set of summaries (Appendices D-F), shows category (type of facility/provider) totals within each type of claim listed within each catchment area. These tables provide overall totals for each catchment area.

All appendix tables show the number of patients, total amount billed, total amount allowed, total paid by government, total paid by patient, and total paid by other sources. In addition, tables summarizing institutional services include the number of admissions, while tables summarizing professional services include the number of services, plus for outpatients, the number of visits. Any records which were zero for the three amounts - total government cost, total patient cost, and total amount allowed, as well as those where the fiscal intermediary denied the claim, were deleted prior to summation. Since each record was extracted based on voucher processing date, the sums shown in the tables may reflect unstable conditions due to claims which were only partially processed during the given time period, and to adjustments to claims processed in previous time periods. Sums reflecting obvious unstable conditions are identified by asterisks in the Appendix tables.

The following should be kept in mind when interpreting the utilization totals. All amounts in the tables resulted from summing together complete and partial claim records. Patient counts represent the number of different patients found on claims processed in the given time period. A patient was counted even if the only record processed was an adjustment to a previous claim. (Note: at the lowest level of an appendix table, the count is the number of unique patients; at any higher level, the number of patients includes duplicate counts if some of the patients were in more than one subcategory.) Admission counts are the total number of new admissions minus any cancellations of new or previously processed admissions. Visit and service counts include adjustments from previously processed claims.

An overall summary of the cost and utilization data presented in Appendices A-F is given in Table 1. For Army Health Services Command as a whole, total mental health treatment costs and utilization decreased from FY 1991 to FY 1992. For example, the number of admissions dropped from 16,084 to 11,066, a decrease of 31.2%; the number of professional services dropped from 1,233,177 to 1,062,386, a decrease of 13.8%; and the total paid by the government dropped from \$443,302,672 to \$309,924,924, a decrease of 30.1%. For all institutional and professional services combined, the average amount paid by the government per patient, per admission, per visit, and per service decreased from FY 1991 to FY 1992: the average paid per patient went from \$3,059.67 to \$2,352.89 (23.1% decrease); the average paid per admission went from \$12,409.27 to \$11,572.16 (6.7% decrease); the average paid per visit went

from \$174.60 to \$172.24 (1.4% decrease); and the average paid per service went from \$197.63 to \$171.19 (13.4% decrease). When the average government payments were broken out by type of claim and type of facility/provider, almost all amounts decreased from FY 1991 to FY 1992; only two amounts showed a small increase: the average paid per admission to a residential treatment center went from \$51,519.57 to \$53,255.76 (3.4% increase) and the average paid per Psych II visit for outpatient professional services went from \$180.75 to \$181.44 (0.4% increase).

Note that the overall average amounts paid by the government (per patient, per visit, and per service) for Psych II outpatient treatments are greater than corresponding averages for Psych I. Initial investigation of this relationship revealed that most of the expensive procedures performed by psychiatrists are done on an inpatient basis; low-cost procedures, such as prescribing medication, account for much of the Psych I outpatient treatments. It was also found that several non-mental health provider specialties were included in both the inpatient and outpatient Psych II data. Preliminary analysis has shown that all of these records have mental health diagnoses, but at least some have procedures which are not mental health-related. This fact also means that possibly some records having mental health procedures were not summarized in this report due to not having mental health diagnoses. Further investigation of these two problems concerning mismatched diagnoses and procedures will be carried out. For the present, keep in mind that the cost and utilization amounts throughout this report may be under- or over-estimating the true values for Psych II.

Distributions of cost and utilization totals by claim type (institutional, inpatient professional, outpatient professional) within FY are shown in Table 2. All the distributions exhibited the same trend across time: the proportion of total cost/use for outpatient professional services increased, while the proportions for institutional and inpatient professional services decreased. For example, the proportion of total government cost due to outpatient professional services was 30.6% in FY 1991, 40.9% in FY 1992, and 48.2% in 1st Qtr FY 1993; while the proportion due to institutional services was 45.0% in FY 1991, 41.3% in FY 1992 and 38.1% in 1st Qtr FY 1993. The proportion of patients receiving outpatient professional services went from 73.8% in FY 1991 to 85.3% in 1st Qtr FY 1993, while the proportion receiving institutional services dropped from 11.8% in FY 1991 to 6.8% in 1st Qtr FY 1993.

Table 3 contains cost and utilization distributions for institutional services by facility type (mental retardation facility, psychiatric facility, residential treatment center, other facilities) within fiscal year. Approximately 70 to 93 percent of each cost/use distribution was for psychiatric facilities and residential treatment centers. Psychiatric facilities had the largest proportion of total patients (60.0% in FY 1991, 56.7% in FY 1992 and 54.3% in 1st Qtr FY 1993) and admissions (61.5% in FY 1991, 60.4% in FY 1992 and 67.8% in 1st Qtr FY 1993); residential treatment centers had smaller, but

increasing proportions of patients (12.7% in FY 1991, 17.9% in FY 1992 and 27.3% in 1st Qtr FY 1993) and admissions (9.1%, 11.1%, and 12.4%, in FY 1991, FY 1992, and 1st Qtr FY 1993, respectively). In FY 1991, psychiatric facilities accounted for more than half of the cost for institutional services: 57.2% of the total amount billed, 52.9% of the total allowed, 51.5% of total government payment, 58.5% of total patient payment, and 70% of the payment made by other sources. However, in FY 1992 and 1st Qtr FY 1993, the percentage of costs for psychiatric facilities decreased, while at the same time, that for residential treatment centers increased. For example, the proportion of total government payment for psychiatric facilities was 51.5% in FY 1991, 39.9% in FY 1992 and 39.7% in 1st Qtr FY 1993; and the proportion for residential treatment centers was 37.7% in FY 1991, 50.9% in FY 1992 and 53.7% in 1st Qtr FY 1993.

Distributions of cost and utilization amounts for inpatient and outpatient professional services are presented in Table 4. Psych I (M.D. and D.O. psychiatrists) accounted for approximately 50 to 75 percent of inpatient totals, and its proportions showed slight to moderate increases across the three time periods. For instance, the proportion of total inpatient professional services done by Psych I providers was 67.2% in FY 1991, 69.0% in FY 1992 and 70.4% in 1st Qtr FY 1993. The proportion of total government payment due to Psych I providers showed a larger increase, changing from 70.6% in FY 1991, to 73.0% in FY 1992, and to 78% in 1st Qtr FY 1993. Approximately 70 to 80 percent of outpatient professional services cost and utilization was for Psych II providers (i.e., non-psychiatrists). The distributions showed only slight changes across the three time periods. Psych II's proportion of outpatient services decreased slightly: 78.7% in FY 1991, 78.6% in FY 1992 and 77.6 % in 1st Qtr FY 1993. The proportion of total government payment for Psych II providers was about the same each period: 79.6%, 80.5%, and 80.1% for FY 1991, FY 1992 and 1st Qtr FY 1993, respectively. For all professional services combined, Psych I accounted for about 26 to 46 percent of cost and utilization totals, and across time, the proportions decreased (except for total patients treated). For example, the proportion of total services provided by Psych I was 32.8% in FY 1991, 29.5% in FY 1992 and 28.7% in 1st Qtr FY 1993; and the proportion for government payment was 42.6%, 35.7% and 32.4% in FY 1991, FY 1992, and 1st Qtr FY 1993, respectively.

Technical Note: The following TCSDP data were utilized for the report:

- A) TCSDP Main Relational Database V1.0
- B) TCSDP Indexing Logic Module PSY
